

Association of Asthma Educators National Asthma Education Review Course

Treating asthma can be complex, but with the right tools and information, healthcare professionals can help increase the quality of care for Alaskans living with the disease. The course is designed for healthcare professionals who provide asthma education and care for individuals living with asthma.

Both a preparatory course for the Asthma Educator accreditation (AE-C) exam and a comprehensive study of asthma management, the course melds the National Heart Lung Blood Institute's (NHLBI) best practice guidelines with credentialed faculty to offer:

- New research on the pathophysiology and factors contributing to asthma
- The latest information on asthma management and education
- Program development and outcome monitoring
- Techniques and skills for delivering asthma education to individuals and families
- Comprehensive NAECB test preparation
- A professional networking environment
